

ATK TECH BINDINGS - BOOTS COMPATIBILITY CHECK

GENERAL REQUIREMENTS

ATK BINDINGS ARE DESIGNED TO WORK WITH BOOTS THAT MEET THE FOLLOWING CHARACTERISTICS:

A) THEY ARE EQUIPPED WITH TECH INSERTS ON THE TOE AND THE HEEL .

B) THE BOOT'S TECH INSERTS MUST BE IN GOOD CONDITION AND SHOW NO OBVIOUS SIGNS OF WEAR.

VERIFY THAT THE BOOT MEETS BOTH OF THE ABOVE CHARACTERISTICS. ANY BOOT THAT DOES NOT MEET EVEN ONE OF THE ABOVE TWO CHARACTERISTICS IS **NOT COMPATIBLE** WITH ATK BINDINGS.

SPECIFIC REQUIREMENTS

TO DETERMINE THE COMPATIBILITY OF A BOOT WITH A SPECIFIC MODEL OF ATK BINDING, YOU MUST:

1) CHECK THE COMPATIBILITY BETWEEN THE BOOT MODEL AND THE BINDING MODEL BY REFERRING TO THE FOLLOWING COMPATIBILITY CHART.

2) HOOK THE BOOT TO THE TOE PIECE AND PLACE THE TOE PIECE IN ASCENT MODE. THEN PIVOTING THE FRONT PINS, CHECK THAT THE BOOT IS FREE TO TRACE AN ANGLE OF AT LEAST 80° TO THE LONGITUDINAL AXIS OF THE SKI BEFORE ITS TIP CONTACTS ANY ELEMENT OF THE TOE PIECE (**FIG. 1**). IF NOT, THE BOOT AND BINDING ARE **NOT COMPATIBLE**. IF THIS CHECK IS ALSO SUCCESSFUL, KEEP THE BOOT INSERTED IN THE FRONT PINS AND PROCEED WITH THE THIRD CHECK.

3) ROTATE THE BOOT FORWARD UNTIL IT RESTS ON THE TOE PIECE. VERIFY THAT THE CONTACT POINT BETWEEN THE BOOT AND TOE PIECE IS ON THE CROCODILE (**FIG. 2**) AND NOT ON THE FRONT LEVER (**FIG. 3**). IF THE CONTACT POINT IS ON THE FRONT LEVER THEN THE BOOT IS **NOT COMPATIBLE** WITH THE BINDING, EVEN IF THE BOOT IS FREE TO ROTATE BEYOND 80° AS REQUIRED AT THE PREVIOUS CHECK. IN FACT, SOME MOVEMENTS OF THE USER COULD LEAD TO UNINTENTIONAL RELEASE OF THE BOOT FROM THE TOE PIECE, CREATING A DANGEROUS SITUATION FOR THE USER.
